SUMMARY

I am a fresh graduate with a bachelor's degree in informatics engineering, focusing on Web Development. I have experience building interactive and responsive web interfaces and am proficient in using technologies such as HTML, CSS, and JavaScript. I also have expertise in React, TailwindCSS, and Bootstrap to create modern and functional web designs. Additionally, I have a foundational understanding of PHP, Node.js, and MySQL for Back-End development, enabling me to work effectively in full-stack web development projects.

EDUCATION

Pamulang University, South Tangerang   Jul 2020 – Aug 2024

Bachelor of Informatics Engineering

GPA 3.45 of 4.00

COURSES

freeCodeCamp   Des 2024

Front End Development Libraries

- Learned to gain proficiency in popular front-end libraries and frameworks such as React and Bootstrap. Developed skills in building modern and responsive user interfaces, enhancing the overall web development experience.

freeCodeCamp   Des 2024
